

ViQi VOICE CONTROL

STAY EYES-UP AND FOCUSED FORWARD

OPERATE YOUR RADIO USING SIMPLE VOICE COMMANDS.

DETAILS

While it's easy to change settings on your APX NEXT™ radio using the traditional hard controls or the touchscreen soft controls, there are situations where you need to keep your eyes up and stay focused on your environment.

Using ViQi Voice Control, you can operate the radio with your voice. From switching channel and zone, to adjusting the volume, to changing your audio profile, all you need to do is press and hold the ViQi button, and speak into the mic.

There are 13 available actions, each accessible using several intuitive commands. With multiple options, you'll find a ViQi command to suit you.

ViQi Voice Control is optimized for public safety situations, and performs well in high-noise environments. The 3-dot buttons on the APX NEXT radio and RSM are configured as the ViQi button by default. Through RadioCentral™, the ViQi function can be assigned to any other programmable control except the purple "monitor" button.

BENEFITS

Officers do not have to look down at the touchscreen, or concentrate on the position of the hard controls. All changes can be done eyes-up and without distraction.

COMPATIBLE PRODUCTS

APX NEXT

DEPENDENCIES

Radio Firmware:
R01.00.00 or later

INFRASTRUCTURE IMPACT

None

SECURITY

ViQi button must be pressed when commands are issued. There is no "wake word" requiring an open mic.

DELIVERY

Optional feature

ORDERING INFORMATION

- H-Option: QA09028 ViQi Voice Control
- Included in Core Trunking Bundle: BD00001AA

COMMANDS AVAILABLE

ZONE AND CHANNEL CHANGE COMMANDS

"Change zone to Z channel to C"
"Change zone to Z and channel to C"
"Change to zone Z channel C"
"Change to zone Z and channel C"
"Zone to Z channel to C"
"Zone to Z and channel to C"
"Zone Z channel C"
"Zone Z and channel C"
"Change zone to Z channel C"
"Switch zone to Z channel to C"
"Switch zone to Z and channel to C"
"Switch to zone Z channel C"
"Switch to zone Z and channel C"
"Go to zone Z channel C"
"Go to zone Z and channel C"

Response:

Either: "<zone name>, <channel name>"
Or: "Already on <zone name>, <channel name>"
